Unit Sizes

About Woodwright Sizes

Standard Picture and Transom Window Sizes

Woodwright Specialty Windows are available in standard sizes (see standard size chart, starting on page 4). Replacements for some standard size windows parts can be ordered using the numbers listed in this catalog. Many replacement parts for standard windows are made to order. These items are ordered using product identification information found on the product label.

Custom Picture Window Sizes

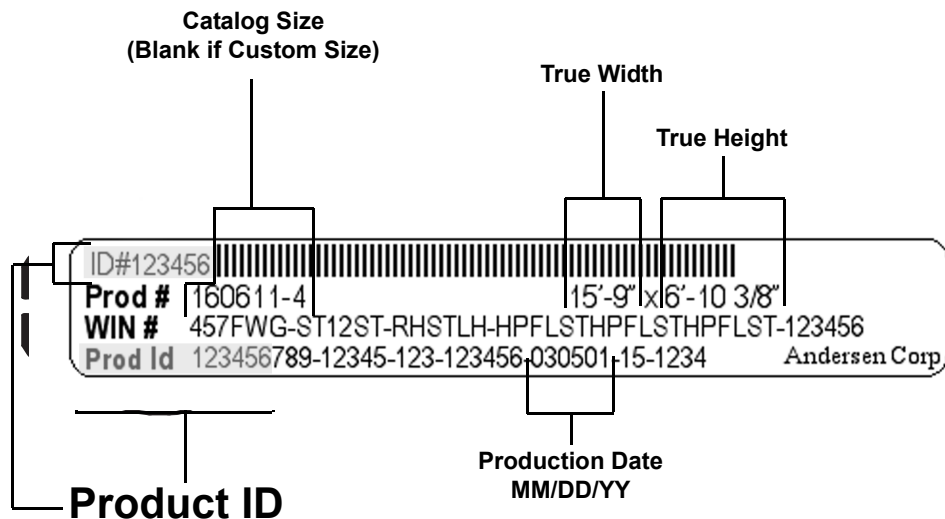

Woodwright Specialty Windows are also available in custom sizes in 1/8" increments between the smallest and the largest standard sizes. Most replacement parts for custom size windows are made to order and can be ordered using the product identification information found on the product label.

Woodwright Product Label

Every Woodwright Window has a permanent label containing a unique identification number. The product ID number may be 5 to 9 digits long, depending upon the age of the unit. On replacement parts the product ID is the set of numbers that appears before the first hyphen.

The label is located under the side stop in the lower right-hand corner.

When ordering replacement parts, please provide the product ID to ensure that replacement parts match the specifications of the original product.
