Unit Sizes

200 Series Product Label

Note:

Some 200 Series Tilt-Wash Windows will have an identification label **or** glass etching containing a unique Product ID. The Product ID on 200 Series Tilt-Wash Windows will be located at the top of the window frame or etched into the glass. See [Service Guide 9051877](#). The Product ID may be up to 14 digits long (excluding hyphens), depending on the age of the unit. Replacement parts will also get their own unique Product ID. When ordering replacement parts, providing the Product ID ensures that replacement parts match the specifications.

200 Series Tilt-Wash Double-Hung Windows (2000 to Present)

Sash

Sash Illustration

See latest [Product Details](#).

Sash - Upper

Note:

Glazing types offered replace all prior versions. Balancers and hardware are not included with sash. Use logo information etched in glass to **identify** glazing type. See [Service Guide 0005265](#). See [Sash Replacement Video](#).

After April 2012, glass was etched with 2.2 or 3.0 in logo for Low E, Low E Sun, Low E Smart Sun and Low E Passive Sun glazings. Sash with 2.2 glass shown in grids beginning on [page 22](#). Sash with 3.0 glass shown in grids beginning on [page 34](#).

Before April 2012, glass was **not** etched with 2.2 or 3.0 in logo for Low E, Low E Sun, Low E Smart Sun and Low E Passive Sun glazings. These sash will use 2.2 glass shown in grids beginning on [page 22](#).

Prior to April of 2012

April 2012 to present

April 2012 to 2015

Sash - Upper / Low E Passive Sun / Natural Wood Interior / 3.0 (April 2012 to October 2015)

Note:
Available by description. Specify White or Sandtone.

Sash - Upper / Low E Sun / Natural Wood / 3.0 (April 2012 to October 2015)

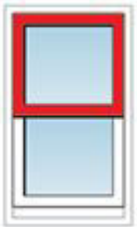

Sash - Upper / Low E Sun / Natural Wood Interior / 3.0 (April 2012 to October 2015)

Note:
Available by description. Specify White or Sandtone.

Sash - Upper / Low E SmartSun / Natural Wood / 3.0 (April 2012 to October 2015)

Sash - Upper / Low E SmartSun / Natural Wood Interior / 3.0 (April 2012 to October 2015)

Note:
Available by description. Specify White or Sandtone.

Sash - Lower

Note:

Glazing types offered replace all prior versions. Balancers and hardware are not included with sash. Use logo information etched in glass to **identify** glazing type. See [Service Guide 0005265](#). See [Sash Replacement Video](#).

After April 2012, glass was etched with 2.2 or 3.0 in logo for Low E, Low E Sun, Low E Smart Sun and Low E Passive Sun glazings. Sash with 2.2 glass shown in grids beginning on [page 46](#). Sash with 3.0 glass shown in grids beginning on [page 58](#).

Before April 2012, glass was **not** etched with 2.2 or 3.0 in logo for Low E, Low E Sun, Low E Smart Sun and Low E Passive Sun glazings. These sash will use 2.2 glass shown in grids beginning on [page 46](#).

Prior to April of 2012

April 2012 to present

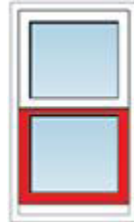

April 2012 to 2015

Sash Balancers

Balancer Size Chart

Note:

Beginning in April of 2012, glass may be etched with 2.2 or 3.0 etchings. If you have a sash made prior to April of 2012 use glass type to identify balancer needed. If you have a sash made after April 2012 use glass type as well as any 2.2 or 3.0 etching around logo. Glass with 2.2 etchings will use Chart 1, glass with 3.0 etchings will use Chart 2.

Service Replacement

Service Replacement Only Parts

Service Replacement Only Parts

Note:

This section is specifically designed for parts that should only be ordered if a Territory Service Manager/Service Provider Company has requested them to be ordered or if the customer agrees to also pay for a non-warranty repair/replace service job (subject to availability) for these parts to be installed. We do not recommend anyone other than a trained AW employee or Service Provider install these parts due to the complexity of installation, modifications required for installation and/or requirement of special tools.

200 Series Grilles - Divided Light

Grille - Divided Light / Interior and Exterior / Permanent

Note:

These grilles can only be ordered by a Territory Service Manager/Service Provider Company. Profiles are 3/4", 7/8", 1 1/8", and 2 1/4".

There is no spacer in these grilles. Grilles have simulated divided light construction and are available in standard pattern or specified equal lights with one profile or mixed profiles.

Grille - Divided Light / Exterior with Removable Interior / Permanent

Note:

These grilles can only be ordered by a Territory Service Manager/Service Provider Company. Profiles are 3/4", 7/8", 1 1/8", and 2 1/4".

There is no spacer in these grilles. Grilles have simulated divided light construction and are available in standard pattern or specified equal lights with one profile or mixed profiles.

Bulletin SM-1108 (July 2008)

Bulletin: SM-1108
 July 10, 2008
 Page: 2 of 4

Overview:

Andersen is pleased to announce the availability of SmartSun™ glass in the Intelligent Quote (iQ) software version 8.1. Andersen customers will now have another glass option in Andersen® 400 Series windows and all patio doors to assist with optimizing visible light transmission while reducing solar heat gain. Additionally, SmartSun glass helps protect interior furniture, carpeting, and drapes by blocking out 95% of the damaging ultraviolet rays that can cause fading.

Andersen is excited to offer SmartSun glass in the following products:

Andersen 400 Series windows

- 400 Series Woodwright® double-hung windows
- 400 Series tilt-wash double-hung windows
- 400 Series casement & awning windows
- 400 Series gliding windows
- 400 Series roof windows and skylights

**** Note: Specialty windows and architectural products can be ordered with SmartSun glass by description only, and will not be available in iQ software at this time.**

400 Series & 200 Series Patio Doors

- 400 Series Frenchwood® hinged patio doors – outswing
- 400 Series Frenchwood® hinged patio doors – inswing
- 400 Series Frenchwood® patio doors – gliding
- 200 Series hinged patio doors
- 200 Series Perma-Shield® gliding patio doors
- 200 Series Narroline® gliding patio doors

Glass Performance Ratings:

Energy performance ratings labeled on the product represent total unit performance as certified by the National Fenestration Rating Council (NFRC) and will differ from center-of-glass properties and product type. The performance characteristics listed below are based on center-of-glass values which were calculated using Window 5.2a software. The values in the illustrations below are based on 3mm glass thickness and a 12.7mm gap.

Andersen® 400 Series High-Performance™ glass options			
Performance Characteristics <small>based on center-of-glass values*</small>	Low-E4*	Low-E4* SmartSun™	Low-E4* Sun
visible light transmitted through glass	72%	65%	40%
ultraviolet rays blocked by glass	84%	95%	84%
solar heat gain coefficient <small>(the lower the number, the less heat gets through the glass)</small>	.42	.28	.26

Glass Logo:

The Andersen laser etched glass logo has been enhanced to include “SmartSun” for easy identification.

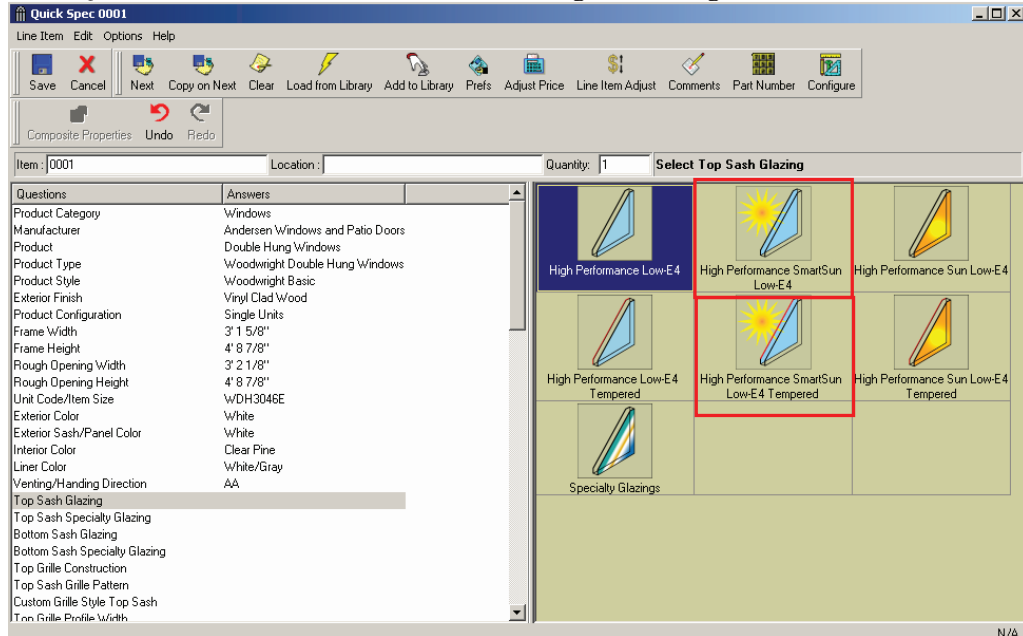

High-Performance™ SmartSun™ Glass (400 Series)

Low-E SmartSun™ Glass (200 Series)

Quoting:

iQ software version 8.1 will have quoting capability for SmartSun glass. Below is an illustration of an iQ software screen shot with the new SmartSun glass ordering icon.

Lead-Time: 11 Days

Lead-time for standard products with SmartSun glass is the same as our current “Sun” products.

Pricing:

A base price unit up-charge of 5% will be applied to products with SmartSun glass. Therefore, the pricing structure will be the same as our current Sun products.

Service Replacement Only Parts

Bulletin SM-1108 (July 2008)

Bulletin: SM-1108
 July 10, 2008
 Page: 4 of 4

Sales Tools:

The following tools are available to help educate our customers about SmartSun™ glass:

- SmartSun glass promotional card (SP-3) - Part Number 9014492 (\$0.20 each).
- 12" x 12" SmartSun™ glass samples - with or without Finelight™ (\$30.00 each).
- High Performance™ light box kit (L-3) - Part Number 2000733 (\$175.00 each)
- 5 1/2" x 7 1/2" SmartSun™ glass samples for light box kit (\$15.00 each)

Note: If part number is not listed, please order by description.

Care and Maintenance:

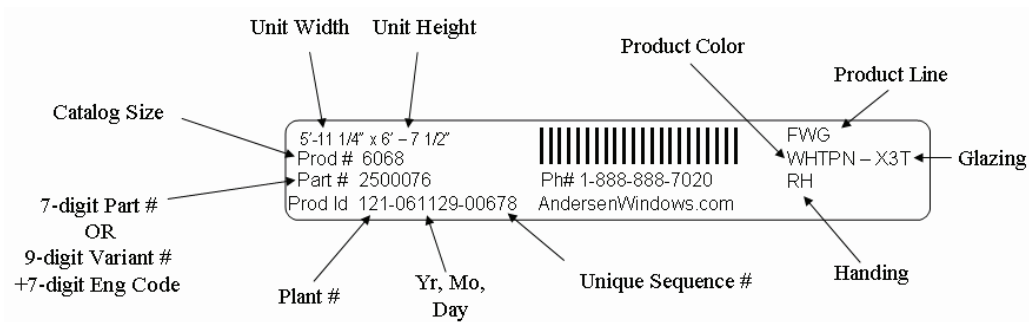

Do not use abrasive cleaners on glass surfaces. Sealants, like silicone, will block UV light and water from contacting the low-maintenance coating and will affect performance. Care should be taken to avoid sealant contact with the exterior of Low-E4® SmartSun glass. Standard liquid glass cleaners are safe to use on the low-maintenance exterior coating.

Please see Andersen care and maintenance guides for more information about caring for Andersen® products.

Limited Warranty:

Andersen continues to offer one of the strongest limited warranties in the industry. A key competitive advantage of the Andersen limited warranty is that it is fully transferable and non-prorated. The same twenty (20) year glass and ten (10) year non-glass coverage will apply for products with SmartSun™ glass. Please see www.andersenwindows.com for further details regarding the Andersen limited warranty.

A warranty label will be applied to the head jamb for the purpose of after sales service. Please see the example label below. You may need to provide the information identified on this label when ordering replacement components. Please see example below.

If you have any questions regarding this product enhancement, please contact the Andersen WindowCare® solution center at 1-888-888-7020.

Bulletin SM-507 (June 2007)

WINDOWS • DOORS
Andersen 
DEALER BULLETIN

June 7, 2007

BULLETIN: SM-507

TO: ALL SALES DIVISIONS

SUBJECT: FACTORY-APPLIED 6-9/16" EXTENSION JAMBS AND NEW "ONE-PIECE"
EXTENSION JAMB DESIGN FOR ANDERSEN® 200 SERIES WINDOWS

EFFECTIVE: ORDER DATE OF JUNE 18, 2007

AUTHOR: PAUL LANDGRAF – PRODUCT MANAGER

Overview

With the next release of Andersen® Intelligent Quote (iQ) software version 7.1 the week of June 18, two enhancements will be made to the 200 Series window line:

- Factory-applied 6-9/16" extension jambs
- New "one-piece" extension jambs, eliminating the "stepped" appearance

We expect that these improvements will make the installation of 200 Series windows easier and more aesthetically pleasing. (Factory-applied 6-9/16" extension jambs for 400 Series windows are announced in a separate Andersen dealer bulletin. Please refer to bulletin SM-407 for all of the details).

6-9/16" Factory-Applied Extension Jambs

With this launch, you will be able to provide your customers with factory-applied 6-9/16" extension jambs on nearly every 200 Series window. Here are important details to bear in mind:

- 200 Series factory-applied 6-9/16" extension jambs include tilt-wash double-hung, gliding and specialty windows.
- Factory-mulled 200 Series tilt-wash windows that receive 6-9/16" extension jambs will be perimeter-applied. However, for 200 Series curve top specialty window combinations and gliding window combinations, 6-9/16" extension jambs will be applied at the mull joint.
- Factory-mulled 200 Series windows that receive 4-9/16" extension jambs will continue to be applied to each unit, including at the mull joint.
- Customers will have the choice between 4-sided and 3-sided (prep for stool) factory-applied extension jambs on 200 Series tilt wash double-hung windows.
- 200 Series windows receiving factory-applied extension jambs will continue to ship in corrugated packaging.
- Factory-applied 6-9/16" extension jambs are not available for Narroline® double-hung windows, basement windows, roof windows and patio doors.

New "One-Piece" Extension Jamb Design

- With iQ software version 7.1, Andersen is converting to a new "one-piece" extension jamb used for 6-9/16" factory applications as well as 5-1/4", 6-9/16" and 7-1/8" extension jamb kits for channel and job site application.
- The new "one-piece" extension jambs provide a cleaner millwork appearance on 200 Series windows, eliminating the "step" created on wall depths over 4-9/16".

Service Replacement Only Parts

Bulletin SM-507 (June 2007)

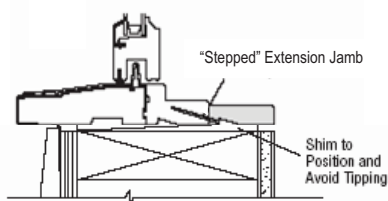

BULLETIN NO.: SM-507

Page: 2 of 4

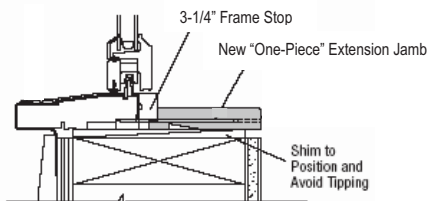

Date: June 7, 2007

- For new “one-piece” extension jamb kits applied in the channel or at the job site, Andersen is returning to the 3-1/4” frame on the 200 Series tilt-wash double-hung. Units with the 3-1/4” frame option will need to be ordered, and then the new one-piece extension jamb applied to it. The base price list for windows with the 3-1/4” frame is too large to e-mail; to obtain a pdf file of the base prices, send your request to: AndersenBulletincomm@andersencorp.com The new 200 Series tilt-wash double-hung extension jamb kit part numbers, descriptions and base prices accompany this bulletin (please see PRD-807).

Current 200 Series Tilt-Wash 6-9/16” Extension Jamb

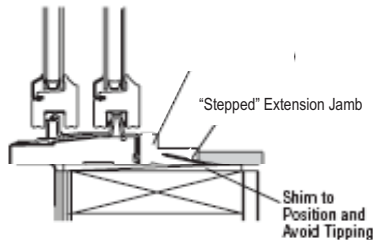

New 200 Series Tilt-Wash 6-9/16” Extension Jamb

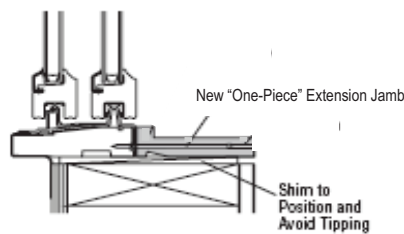

- 200 Series gliding windows with a 2-3/4” frame will need to be ordered when applying the new one-piece extension jamb kits in the channel or at the job site. The new 200 Series gliding window extension jamb part numbers, descriptions and base prices accompany this bulletin (please see PRD-807).

Current 200 Series Gliding Window 6-9/16” Extension Jamb

New 200 Series Gliding Window 6-9/16” Extension Jamb

- The old 200 Series “stepped” extension jambs that apply to the 4-9/16” frame will continue to be available for order to help sell through distribution and dealer inventories. However, the new 200 Series one-piece extension jambs will be automatically quoted in iQ software version 7.1.
- The 200 Series tilt-wash double-hung 3” frame and gliding window 2-3/4” frame for drywall return are available as a factory option.

In summary, here are the 200 Series window jamb options available to customers. They are similar to how Perma-Shield® casement and awning windows are configured and sold.

200 Series Window Jamb Dimension Options

	200 Series Tilt-Wash Double-Hung		200 Series Gliding Window	
	Factory-Applied	Field-Applied	Factory-Applied	Field-Applied

Base Price Examples

The total base price of Andersen® 200 Series windows with 6-9/16” extension jambs applied in distribution remains unchanged. The total base price is slightly less for factory-applied because an integral stop/extension jamb is applied in-line during manufacturing, avoiding additional labor cost to the 200 Series windows. The following base price examples illustrate these options:

**Base Price Comparison of 6-9/16” Extension Jambs (EJs)
Applied to 200 Series Tilt Wash Double-Hung Windows**

Base Price Component	APPLIED IN DISTRIBUTION		FACTORY-APPLIED
	3049 with Old 6-9/16” EJs	3049 with New 6-9/16” EJs	3049 with New 6-9/16” EJs
Unit Frame Dimension	4-9/16”	3-1/4”	3”
Unit	\$300.00	\$280.00	\$280.00
EJ Labor	\$20.00	\$20.00	NA
6-9/16” EJ Material	\$12.20	\$32.20	\$32.20
TOTAL BASE PRICE	\$332.20	\$332.20	\$312.20

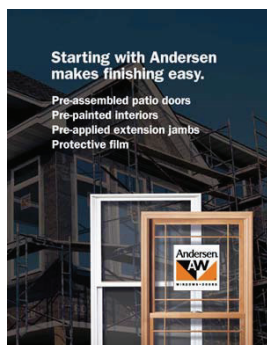

The above base prices are for units with a white exterior, white interior, Low-e glass and 6-9/16” extension jambs. No accessories such as insect screens or grilles are included. The total base price between 400 Series windows with factory-applied extension jambs vs. distribution-applied extension jambs is the same. The slight difference in base prices only exists for 200 Series windows.

Lead Time

200 Series windows with factory-applied 4-9/16” and 6-9/16” extension jambs are available as a 10-day Category 2 lead-time item. If a 200 Series window with factory-applied extension jambs is special-ordered for other reasons such as special glazing, the extended lead time applies.

Market Launch Materials and Support

To help educate your employees and customers about factory-applied extension jambs and other exciting Andersen product line extensions, new jobsite convenience brochures will be distributed to you through your Andersen representative in June 2007. Additionally, Andersen web sites and newsletters will feature the new jobsite conveniences.

Action Steps

Educate Employees and Trade Customers - By expanding the factory-applied extension jamb option, Andersen expects to help dealers grow market share by now providing completely assembled Andersen window packages at “direct-van” prices. If your builders and remodelers are not already receiving pre-applied extension jambs, be sure to introduce them to this value-added service from Andersen.

Manage Inventories and Orders – For the change over to the new 200 Series “one-piece” extension jamb, you will need to determine which tilt-wash double-hung window option you want to stock if you inventory the product:

- Units with the 3-1/4” frame only (to apply any depth of extension jamb)
- Units with 4-9/16” applied extension jambs (if a popular wall dimension in your market)
- Units with 6-9/16” applied extension jambs (if a popular wall dimension in your market)
- Any combination of the above

You will also need to sell through inventory of the old 200 Series extension jamb kits if you stock them. ***As you order new extension jamb kits, we ask that you do not place large initial orders*** for two reasons: (1) to enable Andersen to better-meet initial demand and (2) to give you experience with customer demand for the new extension jamb, so that you can carry an optimal level of inventory.

MARCH 29, 2007

BULLETIN NO.: DH-307

TO: ANDERSEN DISTRIBUTORS AND DEALERS

SUBJECT: INTRODUCTION OF HALF INSECT SCREENS FOR ANDERSEN® 400 AND 200 SERIES TILT-WASH DOUBLE-HUNG WINDOWS

EFFECTIVE: April 2, 2007

AUTHOR: MARY WITZEL – PRODUCT MANAGER

OVERVIEW

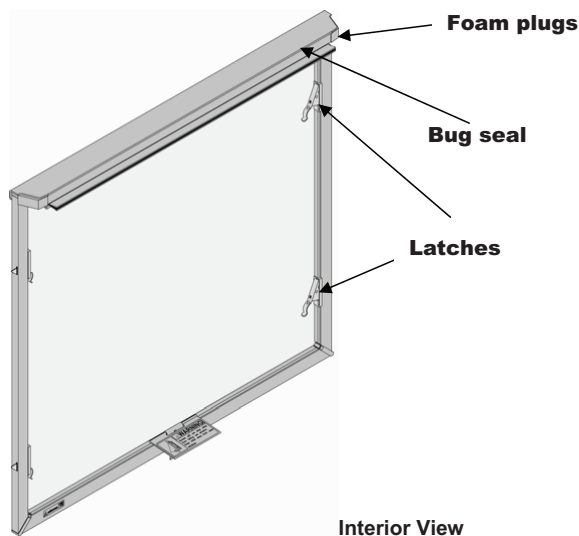

We are pleased to announce that half insect screens for Andersen® 400 and 200 Series tilt-wash double-hung windows are available for order effective April 2, 2007.

DETAILS

400 Series Tilt-Wash Double Hung Windows

The Andersen 400 Series half insect screens are available with either our patented stainless steel TruScene® insect screen cloth or conventional aluminum insect screen mesh. The micro-fine stainless steel TruScene mesh provides a clearer view while keeping even the smallest insects out.

Half insect screens allow ventilation through the lower sash without affecting the view through the upper sash. As shown on the image below the 400 Series half insect screen includes four installation latches and extruded PVC bug seal with foam end plugs for sealing the screen to the unit.

The 400 Series half insect screens with conventional insect screen mesh are available in a standard pack of 12 or in a master kit. The standard pack of 12 and master kits are wrapped in a shrink film. TruScene half insect screens are individually packaged in a corrugated wrap.

The half insect screen is not available for 400 Series tilt-wash double-hung windows with Stormwatch® Protection.

200 Series Tilt-Wash Double Hung Windows

Andersen® 200 Series tilt-wash double-hung half insect screens are available with our conventional glass fiber insect screen cloth. The 200 Series half insect screens are available in a standard pack of 12 or in a master kit. The master kits are wrapped in a corrugated folder.

As shown in the image below the 200 Series half insect screen includes four installation latches and a pile bug seal across the top.

The half insect screen is not available for 200 Series Narroline® double-hung windows or with the Narroline double-hung conversion kit.

LIMITED WARRANTY COVERAGE

Andersen half insect screens carry the same extensive limited warranty as all other Andersen non-glass components - 10 years.

REPAIR AND REPLACEMENT

For questions or service issues contact your distributor or call the Andersen WindowCare® Solution Center at 1-888-888-7020 (toll-free).

LEAD TIME

The part-numbered half insect screens are Category 1 products.

AVAILABILITY AND ORDERING

Andersen® TruScene® half insect screens are available to order on April 2, 2007. The new half insect screens are available in Andersen Intelligent Quote (iQ) software version 7.0 by downloading a patch from the iQ software website. Below are instructions on how to download the patch.

1. Verify that iQ software version 7.0 has been installed on your computer. If it is not installed, please install iQ software 7.0 before downloading "Update Authorization Patch 3-30-07."
2. Make sure the iQ software application is closed.
3. Log into the iQ software web site using the path www.andersenwindows.com/iq
4. Once you have gained access to the web site, click on the "Downloads" link on the iQ software Home Page.

March 29, 2007
Page 3 of 3

5. Select the "Update Authorization Patch 3-30-07" from the patch list. Click once on the "Download Update Authorization Patch 3-30-07" text.
6. A File Download box will appear. The "Save this program to a disk" option should already be selected. If it is not, please select it and click on OK.
NOTE: The patch should not be executed directly from the iQ software web site as all necessary files may not transfer to the appropriate folders on your computer.
7. The "Save As" window will appear. The default folder in the "Save In" field may be either the iQ software folder or your Desktop. If it is the iQ software folder, you should change that Save In field to "Desktop". This will make the update file easier to find and execute and avoid any corruption of the iQ software executable in the iQ software folder. Accept the default file name. You may want to make note of this file name so that you can locate it on your desktop.
8. The Download Complete window will appear when the file transfer has completed. Select the Close button to return to the iQ software web site. Exit the iQ software web site.
9. Locate the "Update Authorization Patch 3-30-07.exe" file on your desktop and double click on the icon. Follow the on-screen installation instructions.
10. Once the file has been installed, you will need to restart your computer for the changes to take effect.

If you have any questions regarding the download or update process, please contact the iQ Software Help Line at 1-888-772-7796.
