Introducing Windows from A New Point of View.

THE ANDERSEN® ARCHITECTURAL COLLECTION

The Architectural Collection is an industry-leading, innovative approach to windows and doors that’s based not on the type of window or door, but rather on the style of home you want to create.

Whether it’s a classic Queen Anne, a Craftsman Bungalow or a style all your own, you can now achieve it with ease. Never before has it been so easy to dream, easy to understand your options and easy to select the windows and doors that fit not just your home, but also your vision.

The Architectural Collection. Only from Andersen.
A-Series Windows & Doors

A-Series products are ideal for those who see themselves in a home with a defined architectural style — whether it’s a stately Queen Anne, a bold Modernist design or anything in between. The windows and doors in this series were designed in conjunction with leading architects to ensure each is authentic to the architectural style of your choosing. They also feature an innovative system of options that work seamlessly together, allowing you to create virtually any style with ease.

E-Series/Eagle® Windows & Doors

For a style all your own or the ability to push a style to its limits, E-Series/Eagle® windows and doors offer unlimited possibilities.

With 50 standard exterior colors, the option to design your own colors, plus a range of interior wood species and finishes, you have ultimate flexibility. Plus, you can create intricate shapes and dramatic sizes to set your home apart.

With E-Series/Eagle® windows and doors, the only style you’re tied to is your own.
E-Series/Eagle® fixed cottage double-hung windows.
Traditional divided light pattern on upper sash.
Selecting windows and patio doors starts with the home they’ll go into. Do you want your home to be authentic to a style of architecture? Authentic, but with personal touches? Or will it be a style all your own? The Andersen® Architectural Collection makes the selection process easy.

**A-Series Windows & Doors**

**AUTHENTIC ARCHITECTURAL STYLE.**

Pages 8–17 show how you can easily create architecturally inspired windows and doors for a range of styles using A-Series products.

**ADDING PERSONAL TOUCHES.**

While the combinations on pages 8–17 can help you accurately achieve each architectural style presented, you may desire different hardware, grille patterns or other specific features. By choosing from the components shown here, you can easily make a window or door your own.

**E-Series/Eagle® Windows & Doors**

**PUSHING STYLE TO THE LIMITS.**

Are you looking for an exotic wood species? A unique grille pattern? Or a dramatic shape you’ve designed yourself? E-Series/Eagle® products aren’t just made to order, they’re engineered to your specifications. By using the elements listed here as your guide, you can create whatever you envision.
Your home’s architectural style says a lot about you. Andersen® A-Series products allow it to speak with authenticity and clarity.

From French Eclectic to Modern to Spanish Colonial, you can create it with A-Series windows and patio doors. And you can do so knowing you’re choosing the best-performing, most energy-efficient products Andersen has ever offered.

**Interior finishes:** A-Series windows and doors offer six different factory stains, two paint choices or a primed finish to complement any look. *Page 23.*

**Exterior colors:** With 11 different colors, you can mix and match sash, frame and trim to achieve hundreds of combinations. *Page 20.*
In the following pages, you’ll see a range of architectural styles and how easily you can create them with Andersen® A-Series products.

While we’ve chosen the quintessential offerings for each style, we encourage you to explore our entire palette of options and accessories to make your home your own.
Tudor

Tudor homes are loosely based on a variety of early English building traditions ranging from simple folk houses to late medieval palaces. Asymmetry is preferred in the Tudor style, allowing standard windows and bay windows to be oriented as desired for optimal views.

**COMMON FEATURES:**
- Casement windows, bay or bow windows and transom windows are most common
- Windows are typically tall and narrow with many small panes and are often grouped together
- Features rectangular or diamond-shaped window grilles — often together in the same house
- Window colors tend to be deep, warm, dark wood tones
- Window frame, sash and exterior trim are typically one color

**SIMILAR STYLES:**
- Queen Anne
- Stick Style
- Victorian

**HARDWARE**

- Window: Traditional Folding Handle
- Patio Door: Yuma®
- Finish: Distressed Bronze

**ENTRANCEWAY**

Door: 203
Sidelights: 101

For more information, please visit andersenwindows.com/entranceways.
French Eclectic

French Eclectic style is not one style, but a range of styles inspired by French architecture, finding its way to America via soldiers returning from World War I. Although its roots are in the south of France, French Eclectic is a very American interpretation of the French domestic vernacular.

**COMMON FEATURES:**
- Casement windows are favored, but double-hung windows are acceptable
- A variety of window types are often used together to create a picturesque look
- Windows are usually rectangular and vertically oriented with multiple rectangular or sometimes diamond grilles
- Window colors are white or an earthy range of browns
- Window frame and sash are typically one color, with exterior trim in a contrasting color or in the same color

Spanish Colonial

The Spanish Colonial style gained widespread popularity in the United States in the first part of the 1900s, primarily in the south and southwest where overheating was a problem much of the year. Thick walls and deep, shaded loggias proved to be an ideal response to the climate and were well-suited to incorporate the architectural details from many eras of Spanish and Mexican homes.

COMMON FEATURES:
- Arched doors, windows and porch entrances — typically half-round shape
- Windows are typically tall and narrow with a rectangular grille pattern
- Casement windows are most common, but double-hung windows are also used
- Doors opening onto loggias, balconies or patios are most commonly French doors
- Frame, sash and brick mould are usually darker in color and contrast with lighter exterior walls — white frame, sash and brick mould also used
- Decorative ironwork often highlights windows and balconies

Queen Anne

The Queen Anne style emerged within the Victorian period between 1880 and 1910. It uses wall surfaces as decorative elements. This is accomplished by avoiding flat walls through the use of gables, bay windows, towers, overhangs, wall projections and several different cladding materials.

COMMON FEATURES:
- Double-hung windows are common, often with upper sash divided into geometric shapes and lower sash without grilles
- Less ornamental grille options are one-over-one and two-over-two patterns
- Wide use of transom windows as part of bay windows and over front windows and doors
- Grilles with rectangles, diamonds and circles are common in front windows, transoms and gables
- Art glass in front windows, accent windows and bay windows
- Exterior colors frequently reflect colors used in art glass

- Patio Door: Whitmore®
- Finish: Antique Brass
- Art glass: Queen Anne Design

Printing limitations prevent exact duplication of colors and replication of finishes. Please see your Andersen dealer for actual color and finish samples.
American Farmhouse

While this style evolved from New England Colonial houses, it is often associated with the Midwest, where it was popular when that region was being settled. Often fairly basic, but when stylistic elements were added, they tended to be borrowed from the Victorian style.

COMMON FEATURES:
• Tall double-hung windows are most common with a height typically 2 - 2½ times the width
• Early farmhouses had no accent windows; later versions used ovals, circles and archtop windows in stair landings, in entryways and below gables
• Historically, more affluent farmhouses often used bay windows and window groupings
• Exterior colors include earth tones as well as whites and pastels
• Two-over-two window grille pattern is most common

A-SERIES STYLE RECOMMENDATIONS

Exterior Color: Red Rock/Prairie Grass

Hardware:
• Window: Lock & Keeper and Bar Lift
• Patio Door: Newbury®
• Finish: Oil Rubbed Bronze

Entranceway:
Door: 402 with optional divided light Sidelights: 101

For additional choices, see pages 20–35.
Georgian/Federal

In the late 1700s, Georgian style marked a time of reformation of the American house from being simply utilitarian and functional to one that was stylized, stately, spacious and comfortable. Its roots were in Classical Roman Architecture. Federal style was a continuation of this movement, but was identifiable by greater attenuation and refinement of many details.

**COMMON FEATURES:**

- Main windows are almost exclusively vertically proportioned double-hung windows with multiple divided lights
- Window pane size evolved from smaller to larger, thus 12-over-12 grille pattern was more common in Georgian style, whereas six-over-six was typical of Federal style
- Front door often features a transom window and sidelights
- White window frames and trim were most popular during the Georgian era, while recent examples use a range of light tones
- Window sash and trim usually match, although slight contrast is also acceptable

---

**A-SERIES STYLE RECOMMENDATIONS**

For additional choices, see pages 20–35.

**EXTERIOR COLOR**

- Dove Gray/Dove Gray

**HARDWARE**

- Window: Lock & Keeper and Finger Lift
- Patio Door: Covington™
- Finish: Bright Brass

**ENTRANCEWAY**

- Door: 180
- Sidelights: 182

For more information, please visit andersenwindows.com/entranceways.

Printing limitations prevent exact duplication of colors and replication of finishes. Please see your Andersen dealer for actual color and finish samples.
Craftsman Bungalow

SIMILAR STYLE: Prairie Shingle

Craftsman-style houses emerged from the traditions of Arts & Crafts designs found throughout the country that promoted a simple decorative expression of structural elements. The bungalow is one of the most common house styles that emerged from that movement.

**COMMON FEATURES:**

- Double-hung windows are predominant, but casement windows are also common
- Grilles are used in upper sash of double-hung windows, creating vertical proportions
- Exterior window trim is usually 4½-inch-wide flat trim with sill nose
- Window frame and sash are often one color and the exterior trim is a contrasting color
- Exterior window colors tend to be in the warm, earthy range of browns, greens, burgundies and yellows

**A-SERIES STYLE RECOMMENDATIONS**

For additional choices, see pages 20–35.

**EXTERIOR COLOR**

- Prairie Grass/Dark Bronze

**INTERIOR STAIN**

- Espresso

**HARDWARE**

- Window: Traditional Folding Handle
- Patio Door: Albany
- Finish: Black

**ENTRANCEWAY**

- Door: 404
- Sidelight: 401

For more information, please visit andersenwindows.com/entranceways.

**ART GLASS**

- Arts & Crafts Design

See pages 30–31 for additional art glass options.
Prairie

The Prairie style is considered the first architectural style of American origin. It features bold, clean lines and came about as a direct reaction to the ornate, compartmentalized Victorian style of the late 1800s and early 1900s. The core design ideas of this style are most widely attributed to architect Frank Lloyd Wright.

COMMON FEATURES:

- Casement windows are heavily favored, often either with art glass or the Prairie grille pattern, which are both shown in the windows to the right.
- Vertically proportioned windows are almost always mulled together to create a horizontal design element.
- Single window units are rare.
- Transom windows are commonly used above doorways and prominent window groupings.
- Common exterior window and trim colors are earthy browns and rusts, autumnal reds and golds, and leafy greens.

ART GLASS

See pages 30–31 for Frank Lloyd Wright® Series art glass.
Ranch houses are typically unpretentious, long, narrow and low to the ground. They became popular among post-World War II veterans and spread across the country, resulting in several variations. Contemporary Ranches are simple and have hipped or gabled roofs and deep overhangs. International-style ranch houses have flat roofs and more glass.

**COMMON FEATURES:**
- Large expanses of glass and horizontal windows
- Gliding patio doors
- A large picture window flanked by narrow casements or double-hung windows is a quintessential grouping in Ranch style
- Front door is not emphasized
- Grilles are typically horizontal or nonexistent
- Casement windows are most common, but double-hung windows are also acceptable

**SIMILAR STYLES:**
- Modern
- Prairie

**A-SERIES STYLE RECOMMENDATIONS**
For additional choices, see pages 20–35.

*Printing limitations prevent exact duplication of colors and replication of finishes. Please see your Andersen dealer for actual color and finish samples.*
Modern

Simple geometry, clean lines and the overt abandonment of architectural ornamentation characterize Modernism. The style deliberately embraced the notions of industrialism and machine-made products as a way to improve life through efficient and affordable construction. Elements of historic styles are generally absent.

COMMON FEATURES:
• Windows, often casements or awnings, set horizontally in long “ribbons”
• Doors and windows align to give a clean look to the exterior
• Grilles are nonexistent
• Color palette is most commonly monochromatic with whites, blacks and grays, often with a strategic accent color such as natural wood

For more information, please visit andersenwindows.com/entranceways.
When choosing windows and doors, you’ll want to consider the style of the home you’d like to create as well as how you’d like the windows and doors to operate. With Andersen® A-Series products, you have the choices you need for a beautiful blend of both form and function.
FRENCHWOOD® HINGED OUTSWING PATIO DOORS
With panels that open outward, these doors give you more usable space inside your home. Available with one or two panels.

AWNING WINDOWS
Awning windows are hinged at the top and open outward. They catch breezes from the left or right and are often used above, below or alongside stationary windows.

SPECIALTY WINDOWS
Specialty windows are stationary (non-opening) windows characterized by their special shapes, including curves and dramatic angles. They can make a signature statement in your home or provide a delicate lighting accent.

VENTING & STATIONARY TRANSMON WINDOWS
Venting transom windows are hinged at the top and open outward. They are placed above doors to let light and fresh air into a room while adding style and curb appeal. Stationary transom windows share all the characteristics of venting transom windows but do not open for ventilation.

TRANSOMS & SIDELIGHTS
Transom windows go above a door while sidelights flank one or both sides of the door. Alone or combined, they can turn your doorway into a focal point while letting more natural light into your home’s entryway.
Outer Beauty

The Exterior of Your Home Is the Face It Presents to the World.

With Andersen® A-Series windows and doors, you have the colors and exterior trim choices you need to make not only your windows, but your entire home look the way you’ve always envisioned.

Select any combination of colors shown here for your exterior frame, sash and trim.
EXTERIOR TRIM THAT FITS WINDOWS, PATIO DOORS AND YOUR VISION.

Exterior trim adds a finishing touch to your windows and is often essential in achieving authentic architectural style. You can match the color of your windows or doors, or complement them with a different color. Durable A-Series exterior trim is low maintenance and never needs painting.
Inner Beauty

A-Series casement windows and Frenchwood® inswing patio door with sidelight and transom windows. Specified equal light grille pattern.
You Shouldn’t Need a Mirror to See Yourself in Your Home.

A-Series windows and doors provide you with a wide palette of wood species and finishes to help you bring your personality and taste to every room throughout your house.

A Menagerie of Glass

A-Series casement, picture and transom windows. Specified equal light grille pattern.
Best-in-Class Glass

Glass can affect energy efficiency more than any other part of a window or patio door — and not all glass performs the same. Some types of glass do a better job at insulating your home. Others provide greater clarity.

You can even choose glass to filter out specific kinds of light. Andersen offers one of the industry’s widest arrays of glass options, enabling you to find the right choice for your climate and your home.

**HIGH-PERFORMANCE™ LOW-E4® GLASS**
Outstanding thermal performance for climates where both heating and cooling costs are a concern. It comes standard on all A-Series products, and is up to 71% more energy efficient than ordinary dual-pane glass.*

**HIGH-PERFORMANCE™ LOW-E4® SMARTSUN™ GLASS**
Offers our best overall thermal performance. It gives you the benefits of Low-E4® glass, plus it helps shield your home from the sun’s heat and filters out 95% of harmful UV rays while letting sunlight shine through.

**HIGH-PERFORMANCE™ LOW-E4® SUN GLASS**
Outstanding thermal performance in southern climates where less solar heat gain is desired. It’s tinted for maximum protection from the effects of intense sunlight while providing all the benefits of Low-E4® glass.

Additional glass options are also available. Visit andersenwindows.com or see your Andersen dealer.

Andersen® A-Series products are available with impact-resistant glass and structural upgrades to meet the tough building codes of hurricane-prone coastal areas. Visit andersenwindows.com/coastal for more information. See your local building code official for specific requirements.

---

Between-the-Glass Art Glass. Statements in Beauty, Style and Color.

A-Series products are available with between-the-glass art glass, which places the decorative panel between the glass panes, providing superior protection for the art glass and making it easy to keep clean. Contact your Andersen dealer for availability.

HISTORIC AND CLASSIC SERIES™

*All of the patterns are also available with clear glass. **Classic Series glass patterns are available with semi-privacy glass or clear antique glass in place of colored glass (except where indicated).
**ART GLASS COLOR OPTIONS**

You can order Andersen® art glass designs in standard color palettes, or create custom combinations. Color palettes and accent jewels for custom combinations are predetermined by style of art glass. For more on custom capabilities, visit [andersenwindows.com](http://andersenwindows.com).

Art glass changes appearance greatly based on lighting in its environment, making it beautiful to look at, yet difficult to represent accurately in print. Printing limitations prevent exact color replication.

Andersen art glass panel patterns vary based on window size and shape.

Colors used in the Frank Lloyd Wright® Series will vary from photos and actual glass samples due to the unique character of the mouthblown glass. Colors in the Classic Series and Historic Series may also vary. Contact your Andersen dealer for more information.

Andersen® A-Series windows and patio doors offer a variety of grille types and grille patterns, making it easy to fit both your style and your home’s. For a signature look, we’ll work with you to create custom grille designs.

*Horizontal rails are also available in 7/8” and 1 1/4" custom widths. **Any number of same-size rectangles across or down.
**GRILLE WIDTHS** *(ACTUAL SIZE SHOWN)*

Shown: Cross sections of grilles showing standard widths and profiles.

- 3/4”
- 7/8”
- 1 1/8”
- 2 1/4”

Our 2 1/4” wide grille can be positioned horizontally across the center of a casement window to simulate the look of a double-hung window.

**GRILLE CONFIGURATIONS**

**FULL DIVIDED LIGHT**
Give your window an authentic look with full divided light grilles that are permanently applied to the interior and exterior of your window with a spacer between the glass.

**SIMULATED DIVIDED LIGHT**
Simulated divided light offers permanent grilles on the exterior and interior with no spacer between the glass. We also offer permanent exterior grilles with removable interior grilles, available in natural wood or prefinished white.

**CONVENIENT CLEANING OPTIONS**
Removable interior grilles come off for easy cleaning. Andersen “Finelight” grilles are installed between the glass panes and feature a contoured 1” or 3/4” profile.

A-Series picture windows. Specified equal light grille pattern.
Optional insect screens are available for all A-Series products. Patio doors feature conventional Andersen® fiberglass insect screens. For windows, choose aluminum insect screens, or TruScene® insect screens that provide a clearer view, help bring the outdoors into your home and are less noticeable from the street.

Our Insect Screens Come in Many Types. Just Like Insects Do.

**TRUSCENE INSECT SCREENS**
Made with a micro-fine stainless steel mesh that’s one-third the diameter of conventional insect screen wire, TruScene insect screens provide 50% more clarity than conventional Andersen® insect screens. They allow more fresh air and sunlight in, while keeping out small insects.

TruScene® insect screens are not available on patio doors. All comparisons are made to Andersen aluminum insect screens.
Frames of TruScene® insect screens for casement, awning and transom windows are also available in three wood-veneered options and six stain colors to match the interior finish. Pine veneer frame with clear finish is shown.

All insect screens for casement, awning and transom windows are available in Stone, White or Gold Dust colored frames. Insect screens installed on the exterior of windows and patio doors have frames that match the exterior color of the unit.

Frames of TruScene® insect screens for casement, awning and transom windows are also available in three wood-veneered options and six stain colors to match the interior finish. Pine veneer frame with clear finish is shown.

Full insect screens are available for all operating Andersen® A-Series windows. Our double-hung windows also give you the option of insect screens that cover only the lower sash.

A-Series products are also available with several styles of patio door insect screens, including a new top-hung gliding design for gliding and hinged doors.

Retractable insect screens are available with interior canisters in White, Gold Dust or prefinished wood to match the interior door. In addition, exterior canisters for gliding doors are color-matched to the outside color of the door.
A-Series Windows and Doors

ENERGY STAR® AWARD 2012

Most Andersen® products meet or exceed ENERGY STAR® criteria, which can reduce your energy bills up to 15% while helping to protect the environment.*

RIGOROUSLY TESTED.
A-Series products have been exposed to extremes, going from temperatures duplicating the cold of Alaska winters to the heat of Death Valley summers, three times a day, day after day. They came through it all beautifully.

NEVER NEEDS PAINTING.
Exteriors won’t flake, rot, blister, peel, pit or corrode,** so they’re virtually maintenance free. Plus they hold their original vibrant colors.**

KEEPS THE WEATHER OUT.
With their weather-resistant seals, A-Series windows and doors can stand up to eight inches of rain per hour and hurricane-force winds.† Double-hung windows feature a dual-bulb seal, and casement windows use “refrigerator” style gaskets to keep air and moisture out.

Most other window and door warranties end when a home is sold, but our coverage — 20 years on glass, 10 years on nonglass parts — transfers from each owner to the next. And because it is not prorated, the coverage offers full benefits, year after year, owner after owner. So it adds real value when you decide to sell your home.

BUILT FOR YEARS TO COME.**
A-Series windows and doors are built strong to last long.** We use the right materials in the right places, including solid wood, fiberglass and our own Fibrex® composite material. These give A-Series products superior strength, stability and long-term beauty.

ENERGY-SAVING GLASS FOR ANY CLIMATE.
Andersen has the glass you need to get the performance you want, including a variety of Low-E glass options to help you control heating and cooling costs in any climate, plus SmartSun™ glass options that help meet ENERGY STAR® qualifications in all climate zones.

Savings may vary geographically and may vary based on other home insulating attributes.
**For a copy of the A-Series Limited Warranty visit andersenwindows.com/warranty.
†Andersen A-Series double-hung window tested to AAMA/WDMA/CSA 101/5.2 A440-08 PG 70.
A-Series Frenchwood® hinged inswing patio doors, sidelights and transom windows. Specified equal light grille pattern.
E-Series/Eagle® WINDOWS AND DOORS

Windows to Your Imagination. Doors to Your World.

With E-Series/Eagle® windows and doors, the home you’ve always imagined can be more than a dream. More than a vision. It can be reality.

Custom colors. Unlimited design options. Dynamic sizes and shapes. Every E-Series/Eagle® window and door is made to your exact specifications, giving you unmatched freedom. You can even work directly with a window specialist to get the product you want with the performance you need.

The inspiration for your home can come from anywhere. The ability to fulfill it comes from E-Series/Eagle® windows and doors.
In the following pages, you’ll find a small sampling of what’s possible with E-Series/Eagle® products. No matter what you have in mind, E-Series/Eagle® windows and doors can help you create your personal vision of home.

Unlimited Possibilities.
E-Series/Eagle® Windows

**DOUBLE-HUNG WINDOWS**
A double-hung window has two vertically sliding sash (glass panels) in a single frame. Double-hung windows lift open while remaining flush with the wall, making them ideal around patios, decks and walkways. Both top and bottom sash tilt in for easy cleaning.

**CASEMENT WINDOWS**
Casement windows are hinged windows that open outward to the right or to the left. They’re common above kitchen sinks and give you the flexibility to group in stunning combinations. French casement windows feature side-by-side left- and right-opening sash with no center mullion bar. Push-out casement windows feature a manual lock handle to push open the window.

**AWNING WINDOWS**
Awning windows are hinged at the top and open outward. They catch breezes from the left or right and are often used above, below or alongside stationary windows. Push-out awning windows feature a manual lock handle to push open the window.

You want your home’s windows and doors to reflect your inspiration, but you also want them to fit your lifestyle. With E-Series/Eagle® products, you have the choices you need for a beautiful blend of both form and function.

E-Series/Eagle® Doors

**SLIDING DOORS**
Sliding doors have at least one door panel that slides smoothly past another door panel. Choose from our sliding patio or sliding French door styles. Both are available with two, three or four panels.

**HINGED INSWING FRENCH DOORS**
Available with one or two panels, with at least one panel that swings inward, which saves space on balconies, small decks and patios.

**HINGED OUTSWING FRENCH DOORS**
Available with one or two panels, with at least one functioning panel that swings outward, allowing for more usable space inside a room.
TRANSOMS & SIDELIGHTS
Transom windows go above a door while sidelights flank one or both sides of the door. Alone or combined, they can turn your entry into a focal point while letting more natural light into your home’s entryway. Many options are available, including a venting sidelight that allows fresh air into your home even when keeping the door open isn’t an option.

BAY & BOW WINDOWS
Bay and bow windows are window combinations that project outward from a home. E-Series/Eagle® bay and bow windows create a focal point that is visually striking.

SLIDE-BY WINDOWS
Slide-by windows feature two or three sash, with at least one of the sash sliding past the others. They provide the advantages of double-hung windows with a more contemporary look.

SPECIALTY WINDOWS
Specialty windows are stationary (non-opening) windows characterized by their special shapes, including curves and dramatic angles. They can make a signature statement in your home or provide a delicate lighting accent.

E-Series/Eagle® hinged outswing double door with sidelight. Traditional divided light pattern.
Unlimited Exteriors

E-Series/Eagle® cottage double-hung windows. Traditional divided light pattern on upper sash.
50 EXTERIOR COLORS
MULTI-TONE EXTERIORS
SEVEN ANODIZED FINISHES
CUSTOM COLORS
Do You Dream in Color?

Color enhances your design, and we believe it shouldn’t have to cost more. Start with one of our 50 exterior color options, an industry-leading palette available at no additional cost. Add to that our two-, three- and four-tone exteriors, and set your E-Series/Eagle® windows and doors apart from the rest.

Whether your inspiration comes from an autumn leaf, a river-washed stone, a glass of wine or even a classic car, E-Series/Eagle® products bring it to life with their custom capabilities. Additionally, for an added look of distinction, consider one of our seven spectacular anodized finishes.

MULTI-TONE EXTERIORS
Create two-, three- and four-tone color combinations by mixing and matching up to four exterior finish options.
EXTERIOR COLORS

With E-Series/Eagle® windows and doors, you have the freedom to choose 50 exterior colors, or specify a custom color. You can also combine up to four colors for added curb appeal. Or choose one of our anodized finishes for a rich, lustrous metallic appearance.

UNLIMITED CUSTOM COLORS

You shouldn’t have to settle for “close enough.” We will work with you to develop a custom exterior color that meets your needs.
E-Series/Eagle® radius single-hung window. Custom divided light pattern.
Surrounded in Beauty.

E-Series/Eagle® windows and doors are available with a variety of exterior trim options that help take your home from ordinary to extraordinary. It’s an ideal way to make every window and door an even more attractive part of your home while adding your own personal touches at the same time.

EXTERIOR TRIM OPTIONS

Featuring intricately defined detail made possible through the use of extruded aluminum, our exterior trim options extend outward from the window or door frame, casting a shadow line consistent with true historical applications. Choose from a selection of flat and profiled casings, brickmold casings and sill nosing. Or design your own custom trim profile. Match or contrast the trim with your window and door in any of our 50 exterior colors, custom colors and anodized finishes.

Printing limitations prevent exact color duplication. Please see your Andersen dealer for actual color samples.
Unlimited Interiors

E-Series/Eagle® trapezoidal and rectangular picture windows with awning windows and inswing doors.
DISTINCTIVE WOOD SELECTIONS
CUSTOM WOOD INTERIORS
11 INTERIOR FINISHES
CUSTOM STAINS AND MATCHING
A Range of Interiors. Including Yours.

Beautiful wood can turn any interior into a conversation piece. E-Series/Eagle® products feature the natural beauty of pine or mixed grain fir as standard options. Additional wood species are also available, offering a full range of character. Each wood species can be finished in one of eight interior stains, two basecoat colors or clear polyurethane. For complete design freedom, you can also specify virtually any species of wood or have us custom match a finish for you.
DISTINCTIVE WOOD SELECTIONS

Our distinctive woods add uncommon flair to any room. Each has its own character, grain and staining capabilities, so you can select one that makes your windows stand out or one that blends seamlessly with your interior décor.

CUSTOM WOOD INTERIORS

If an exotic species is required to complete your home, we will try to source any variety that meets our production standards and your needs.

INTERIOR FINISHES

Our high-quality, factory-applied stains offer you convenience along with beauty. Choose from eight stain colors. If you prefer a painted interior, choose one of our basecoat options to get you started. Or for a natural look, select our clear polyurethane option.

CUSTOM STAINS AND MATCHING

Need a special finish for just the right look, or to match existing woodwork? We offer custom stain matching if you need it.

A Range of Glass Types for a Range of Needs.

For both beauty and performance, E-Series/Eagle® products extend your design freedom to glass and divided lights. We offer a multitude of glass options, including High-Performance™ Low-E4® glass as our standard option. Our exclusive HarborMaster® systems for severe weather are perfect for coastal conditions. In addition, you can choose from stunning decorative glass collections and flexible divided light options, or design your own for just the right look.

**HIGH-PERFORMANCE™ LOW-E4® GLASS**
Standard on all E-Series/Eagle® products. It’s up to 40% more energy efficient in winter and up to 57% more efficient in summer.

**HIGH-PERFORMANCE™ LOW-E4® SMARTSUN™ GLASS**
It gives you the benefits of Low-E4® glass, plus it helps shield your home from the sun’s heat and filters out 95% of harmful UV rays while letting sunlight shine through.

**HIGH-PERFORMANCE™ LOW-E 240**
It’s tinted for maximum protection from the effects of intense sunlight while providing all the benefits of Low-E4® glass.

Additional glass options are also available. Visit eaglewindow.com or see your Andersen dealer.

**IB1 COATED GLASS**
Innovative coating applied to the room side glass surface of a dual-pane unit provides improved U-Factor values by reflecting escaping heat back into a room. When combined with our other glass options, the i81 glass coating helps many products meet U.S. ENERGY STAR® Version 5.0 requirements in the Northern Zone.

**TRIPLE-INSULATED GLASS**
Three panes of glass combine with either argon or air and Low-E coatings to provide enhanced energy performance. Adding triple-insulated glass to one of our windows or doors produces a lower U-Factor than using regular dual-pane glass.

**PASSIVESUN™ GLASS**
Great solution for colder climates zones where higher heat gain is desired. It allows a higher amount of the winter sun’s heat to pass into the home as compared to Low-E4® glass, making it ideal for passive solar applications.

*See your local code official for building code requirements in your area.
**Winter and summer values are based on comparison of E-Series/Eagle® Talon® 3866 double-hung window U-Factor to the U-Factor for clear dual-pane glass nonmetal frame default values from the 2006, 2009 and 2012 International Energy Conservation Code “Glazed Fenestration” Default Tables.
**ADDITIONAL GLASS OPTIONS**

**HARBORMASTER® IMPACT-RESISTANT PRODUCT SYSTEMS**
Designed for impact resistance, these systems use monolithic or insulated laminated glass in combination with structural enhancements to meet or exceed the stringent code requirements of ASTM and TAS testing protocols.*

**DECORATIVE AND SPECIALTY GLASS**
Select from our decorative glass collections found online at eagletwindow.com or combine beveled, frosted, grooved, colored or textured glass with three caming options to create your own design. Specialty glass includes tinted glass, spandrel glass and Mapes panels as well as rain, reeded and obscure glass options.

Aluminum grilles conveniently placed between two panes of glass for easy cleaning inside and out.
**PROFILES:** 3/8" flat and 1" contoured

**DESIGN YOUR OWN DIVIDED LIGHTS**
We offer a variety of divided light patterns to choose from or design your own with varying lines, curves and shapes to create a truly unique pattern.

*See your local code official for building code requirements in your area.*
Screen out the Insects, Not the View.

E-Series/Eagle® insect screens let the beauty of the outdoors in, while keeping even small insects out. Choose from a wide selection of insect screen styles, including options that blend seamlessly with your window.

INSECT SCREEN OPTIONS

TRUSCENE® INSECT SCREEN
TruScene® insect window screens are made with a micro-fine stainless steel mesh that offers 50% more clarity than our conventional aluminum mesh screens. TruScene insect screens let in more fresh air and sunlight and keep small insects out.

WOOD-VENEERED INSECT SCREEN
E-Series/Eagle® interior window insect screens can be veneered in one of our beautiful wood selections, allowing the frame to blend seamlessly into your window.

CONCEALED INSECT SCREEN FOR DOORS*
This insect screen is built with an innovative color-matched housing that hides the insect screen when not in use. It's there when you need it and gone when you don't.

RETRACTABLE INSECT SCREEN FOR WINDOWS
Made specifically for casement and awning windows, this insect screen is a sleek addition to any home. In place, the insect screen keeps insects out. When retracted, it provides a beautiful clear view.

Additional insect screen options are also available. Visit eaglewindow.com or see your Andersen dealer.
Privacy Options You Simply Have to See.

E-Series/Eagle* blinds or shades between the glass provide the ultimate in practicality for your home. Our systems not only protect the blinds or shades, they also greatly reduce your cleaning time. Which means with Andersen, you have both privacy and convenience at your fingertips.

**BETWEEN-GLASS BLINDS**

Between-glass blinds can be added to many of our doors and rectangular picture windows. Choose one of four popular colored blinds that are placed between two panes of glass. Control both tilt and raise* conveniently with a single cord.

**SYSTEM 3 BLINDS AND SHADES**

System 3 blinds and shades create a triple-glazed window that provides greater energy efficiency and protects your blind or shade from damage. They are perfect for casement, awning and picture windows and hinged doors. Frames are available in tan, gold, white or optional wood veneer.

**CONTROL KNOBS**

Bronze White Black Gold

**BLIND COLORS**

Almond Tan Gold White

**SHADE COLORS**

Almond Pearl Vanilla Winter White

*Not all sizes of between-glass blinds are retractable. Printing limitations prevent exact color duplication. Please see your Andersen dealer for actual color samples.

VeriLock™ integrated security sensors are an innovative technology that integrates wireless security sensors into select E-Series/Eagle® windows and doors. These exclusive sensors are unique as they detect whether the windows and doors are locked or unlocked* — a feature no other sensors can provide.

**A Sense of Security**

**PEACE OF MIND AT A GLANCE**
Most security sensors can only detect whether a window or door is open or closed. VeriLock™ sensors not only do that, they also detect whether your windows and doors are locked or unlocked. With VeriLock™ sensors and a quick glance at your security system keypad,* you’ll know if you’ve secured your home for the day or night.

**NO VISIBLE WIRES OR SENSORS**
VeriLock™ sensors are built directly into the design of E-Series/Eagle® windows and doors, eliminating the need for unsightly wires or visible sensors. With VeriLock™ sensors, there’s nothing to detract from the beauty of your new E-Series/Eagle® windows and doors.

**PREVENT YOUR WARRANTY**
The installation of wires and sensors can actually void most window and door warranties. VeriLock™ sensors are built into your windows and doors at the factory, so your window and door limited warranty remains intact.

**MAXIMIZE ENERGY EFFICIENCY**
Air escapes through windows and doors that are left opened or even just unlocked. With VeriLock™ sensors you can easily verify that your windows and doors are providing maximum energy efficiency.

**AVAILABLE WITH MOST E-SERIES/EAGLE® PRODUCTS INCLUDING:**
- Casement and awning windows
- Double-hung windows
- Inswing and outswing, single- and double-doors
- Sliding doors

See your Andersen dealer for product-specific details.

*When properly configured and maintained with a professionally installed Honeywell® security system.

**“Honeywell” is a registered trademark of Honeywell International, Inc.**
E-Series/Eagle® Windows and Doors

Engineered for Performance, Durability and You.

Most E-Series/Eagle® products meet or exceed ENERGY STAR® criteria, which can reduce your energy bills up to 15% while helping to protect the environment.*

BUILT STRONG.
E-Series/Eagle® windows and doors are made with heavy-gauge, extruded aluminum-clad wood sash and frames. Our thick cladding offers greater structural capabilities than thinner, roll-form aluminum, while providing a superior exterior finish that resists the elements of inclement weather, abrasion and impact.**

LOW-MAINTENANCE EXTERIORS.
Baked-on silicone polyester enamel exteriors offer virtually maintenance-free performance and durability. They’re warranted for 10 years against chalking and color change and for 20 years against cracking, checking, peeling, flaking, blistering and loss of adhesion.**

PROTECTION FOR COASTAL AREAS.
E-Series/Eagle® windows and doors with HarborMaster® impact-resistant systems meet building code requirements in many Gulf and Atlantic coast states.†

Most other window and door warranties end when a home is sold, but our coverage — 20 years on glass, 10 years on nonglass parts — transfers from each owner to the next. And because it is not prorated, the coverage offers full benefits, year after year, owner after owner.** So it adds real value when you decide to sell your home.

ENERGY-SAVING GLASS FOR ANY CLIMATE.
We have the glass you need to get the performance you want, including a variety of Low-E glass options to help you control heating and cooling costs in any climate, plus SmartSun™ glass options that help meet ENERGY STAR® qualifications in most climate zones.

DESIGN VERSATILITY.
Extruded aluminum’s strength and versatility allow us to offer beautiful made-to-order design solutions for practically any combination of shapes and styles you can imagine. And because our exterior frame, sash and trim components utilize extruded aluminum, our products feature clean, architecturally accurate lines and details to complement your home’s style.
