Key

A Hinge

B #10 x 3” Wood Screws

C #10 x 1-3/4” Wood Screws

D #10-32 x 3/4” Machine Screws (Jamb Hinge)

E #10-32 x 1/2” Machine Screws (Astragal Hinge)

For hinge replacement, begin at step 1.

For hinge adjustment, begin at step 4.

Read and follow these warnings during installation.

⚠️ WARNING

Follow manufacturer’s instructions for safe operation of hand/power tools. Always wear safety glasses. Failure to do so may result in injury and/or product damage.

⚠️ WARNING

Use caution when working at elevated heights and around unit openings. Follow manufacturer’s instructions for safe use of ladder and/or scaffolding. Failure to do so may result in injury or death.
Identify active panel and open.

Block door in full open position for hinge access and to keep panel from shifting when removing middle hinge(s).

**WARNING**

Do not remove more than one hinge at a time. Removing all hinges could cause panel to drop causing severe injury. Replace only one hinge at a time.

Remove and replace top or bottom horizontal adjustment hinge, one at a time. **Or** remove and replace middle vertical adjustment hinge(s), one at a time. Properly dispose of old hinges and screws.
4
Interior

Remove blocking. Check panel operation.

5
Interior

Horizontal Adjustment

Turn top and bottom hinges clockwise to move panel toward hinge jamb.

Equal Gap at Each Hinge

Turn top and bottom hinges counterclockwise to move panel away from hinge jamb.

Four hinge single door shown.

Equal Gap Along Sides

Adjust panel for equal gap side to side (horizontal adjustment).
Adjust panel gap by turning middle hinge adjustment screw until gap at top equals side (vertical adjustment).

Inspect from exterior for contact between panel and weatherstrip. If necessary, adjust latch receiver tab to achieve weatherstrip contact/compression using a flat blade screwdriver.

Installation is finished.
