

Manufacturer's Certification Statement
Related to
Andersen® 400 Series Exterior Windows and Doors
that are Eligible Building Envelope Components under Section 25C of the Internal Revenue Code as
amended by the American Taxpayer Relief Act of 2012

Andersen Corporation
100 Fourth Avenue North
Bayport, MN 55003

This Manufacturer's Certification Statement ("Statement"), dated February 27, 2013 identifies Andersen® 400 Series exterior windows and exterior doors manufactured by Andersen Corporation ("Andersen") that may qualify as "Eligible Building Envelope Components" for a tax credit under Section 25C of the Internal Revenue Code, as amended by the American Taxpayer Relief Act of 2012 (the "2012 Act").

The 2012 Act modifies the tax credit for certain energy efficient components that are purchased and installed from January 1, 2012 through December 31, 2013. The tax law requires that certain requirements be met to qualify for the credit. For example, exterior windows, doors and skylights may qualify for the tax credit if they meet the ENERGY STAR® program requirements of the climate zone in which the product(s) will be installed. The components must also be installed in a dwelling unit in the United States that is owned and used by the taxpayer as the taxpayer's principal residence. The original use of the components must commence with the taxpayer, and the component must be expected to remain in use for at least 5 years.

Based on Section 25C of the Internal Revenue Code as amended by the 2012 Act, as well as guidance from previous IRS Notice (2006-26)¹, Andersen has determined, based on U-Factor and SHGC (Solar Heat Gain Coefficient) ratings certified by the National Fenestration Rating Council (NFRC)², that certain Andersen® products meet the Version 5.0 (referred to as 2010) ENERGY STAR program requirements for windows, skylights and exterior doors depending on the ENERGY STAR climate zone. As a result, we have concluded that products that meet the ENERGY STAR program requirements for U-Factor and, as applicable, SHGC as listed in the Andersen NFRC Rating/ENERGY STAR qualification document by ENERGY STAR climate zone listed on the Andersen website at <http://tinyurl.com/bzz6sqg>³ is an "Eligible Building Component" that may qualify for the credit allowed under Section 25C when installed in the applicable ENERGY STAR climate zone. Products with special glass options and custom sizes larger than those listed do not qualify at this time. Information on how to determine the U.S. climate zone where you live can be found at: http://www.energystar.gov/index.cfm?fuseaction=windows_doors.search_climate

Under penalties of perjury, I declare that I have examined this Statement, and to the best of my knowledge and belief, the facts are true, correct and complete.
